Sit up straight and breathe. While keeping the area or a certain individual in mind, tap gently with the tips of the fingers of one hand, beginning just below the sternum. As you inhale, tap up the sternum following your esophagus to your lower lip. Pretend that you are gathering energy as you tap up from your solar plexus. When you reach your lower lip, expel your breath and with your tapping hand while you throw the energy away from you. Then begin again from the solar plexus.

Keep tapping for up to three minutes.
